Reviewer Comment:**1. Strong points:**

In this work, the authors performed an Analysis of Importance of Pre-requisite Subjects on Student Academic Performance in Dependent Subjects Using Association Rule Mining.

2. Weak points:

- The title of the manuscript needs modification and is currently too long and also name of section 2
- Add organization of the paper at the end of Introduction Section.
- Identify the motivation behind this work and write in a separate para of the Introduction Section.
- Rewrite the Conclusion Section in details and incorporate the future scope.
- Add more recent work in Reference Section.

Following few regarding formatting points must be read thoroughly and noted carefully:

- a. The manuscript should be prepared in Springer LNCS format using MS WORD and/or LaTeX template available respectively in MS word (.doc), MS word (.dotm) , and LaTeX. The guidelines given here may help you to prepare the manuscript. Preferable format of manuscript is through LaTeX. These templates and guidelines can also be found in publisher's homepage or in our Website by clicking on 'Author Guidelines' section (<http://www.icacie.com/2019/author-guidelines>).
- b. The figures / graphs / plots in the manuscript MUST be of good resolution (600 dpi or more), tables MUST NOT be in pictorial format. Text in figures should not be too small, and preferably of equal size as text of the article.
- c. Figures, text, or the tables MUST be visible within boundary of the text area of the page and MUST NOT go beyond it. DO NOT make figures / graphs / plots small beyond limit of normal visibility.
- d. Do NOT use any Social / Academic titles (e.g. Mr., Ms., Dr., Prof. etc) preceding the author names. Do NOT mention the position of a person (e.g., research scholar, student, assistant professor, professor, IEEE member, IEEE student member etc.) in the affiliation.
- e. Mention full address, affiliation, and email of ALL authors, specify a corresponding author with the corresponding e-mail ID. [The publisher will send the proofreading of article to this e-mail]
- f. Do not make any page numbering and do not give any running head title.
- g. Every article must bear a self-composed independent single paragraph as Abstract, which MUST NOT bear any citation or reference. Abstract MUST not have a section number.
- h. Articles must be written in spell checked and grammatically correct English.
- i. All references, figures, and tables should be numbered in sequence starting from 1 and MUST be duly cited / referred within the text.
- j. Adhere to page size (A4 : 8.27"X11.69"), page margin size (top:2.05", bottom:2.05", left/inside: 1.73", right/outside: 1.73"), line spacing ('single'), and font style ('Times'), font sizes (Title: 14pt - bold, Abstract: 9 pt, Keywords: 9 pt, Section header : 12 pt - bold, Subsection header: 10 pt - bold, Table and figure caption: 10 pt - bold, Text body: 10 pt) as prescribed in Springer LNCS template, do not manually alter ANY of these parameters.
- k. Deeply verify the referencing style of LNCS, which will help to produce correct reference format. A reference should bear following parameters in proper format: author name(s), title of article/book, conference/journal name, volume, issue, page numbers, publication year.
- l. Publication charge will be counted on the number of pages an article contains after being formatted according to LNCS guidelines.
- m. Any change to be made in Title of the article or list of authors must be brought to the notice of the organizers with a mail with subject line "Change in title and/or authors: PID: ICACIE XXX" to panigrahicr@gmail.com and CC to icacie2019@gmail.com. Any change in author list needs to be vouched with signed approval by ALL authors initially mentioned for the article.
